Maruf Hakyemez

Civil Engineer / Computer Engineer

ABOUT ME

I was born in Trabzon in August 1995. I have been learning/programming since 2013. I learned all mostly by myself. Since I love R&D, i am searching, learning, working with latest technologies. I have been working since 2016 on enterprise grade projects. I have started my engineering education in Civil Engineering department at Avrasya University, then started to Computer Engineering at same university.

Some Projects

Ziraat Katılım, Income Prediction

In this project, I created an App for Ziraat Katılım which predicts customers current income based on older data provided.

Ziraat Katılım / SCISOFT, Remote KYC Verification

I worked as back-end engineer and system designer in this project, Basically it connects customer to an agent and with help of AI lets them Verify customer is real and correct person.

Racoo

Worked as system designer, back-end engineer. This app contains a virtual study coach, social platform for students, question based games and more.

Kivi ERP

HakYazılım ERP Project, Working as back-end developer, R&D Researcher

Altın Barkod

HakYazılım Jewellery Solution

TüpNET

Automation for tank filling plants
